Section 2: Check-in FIDS Type 1 Layout:

Configuration of this type is as follows:

- The top of the page will have the airline logo (-lw image).
- The left hand side will have a Sydney Airport/ or airline advertising material sign (animated GIF cadv).
- The right hand side will have the LAGS security and other regulatory signage.
- The middle of the page will be designated to the airline check in products (classes). Each airline is allowed a maximum of 9 images to represent their check in products (Classes). If an airline elects not to have an images attached to their classes, then the name of the check in product (Class) will be displayed in text on a Sydney Airport default background **(Default Configuration)**. Please indicate the classes that the airline will have. An image (_c1: 640 X480 pixels) is required for each class or the name of the airline product will be displayed as text **(Default Configuration)**.
- Please note while there is a limit of 9 classes associated with images for each airline, should the airline elect to have more than 9 classes, these additional classes will be displayed in text on a Sydney Airport default **background (Default Configuration)**.
